INSTALLATION INSTRUCTIONS

1 To activate your new box, visit armstrongonewire.com/SelfInstall and enter the phone number associated with your Armstrong account.

2 Connect the EXP Stream device directly into the HDMI port, or use the provided jumper cable. Keep in mind what the port is labeled on the back of your television.

3 Attach the provided power cord to the EXP Stream device and plug the power adapter into a wall outlet or surge protector.

4 Follow the on-screen instructions. The first thing you should see is the "Pair Your Remote" screen. If you do not, use the remote that came with your TV to change to the HDMI input you connected the box to in Step 1.

If your remote does not pair automatically, press and hold the TiVo and Back buttons until the LED on the remote lights up red. Once lit, release the keys and the light will flash amber.

NOTE: If your remote does not light, double check the orientation of the batteries as both batteries will go in the same direction.

5 Continue following the on-screen prompts which will include choosing a language, connecting to your Wi-Fi network, and signing into your Google account. Your box will come pre-installed with some of the most popular apps. To download additional apps, a Google account is required to access the App store.

Don't have a Google account? Get a free one at <https://accounts.google.com/signup>

6 Enjoy! Once you complete the on-screen instructions you should have a Watch TV option on your screen.
