

QUICK START GUIDE

zoom

YOUR NEW ADVANCED MODEM FROM ARMSTRONG HAS ARRIVED.

Now that your new modem has arrived, simply install it in the same location as your current modem.

We care about the environment and ask that you return your old modem to our office for recycling at your earliest convenience or contact us for assistance.

1

Transfer the COAXIAL CABLE connector from your old modem to the new one. This wire connects to the cable outlet in your home.

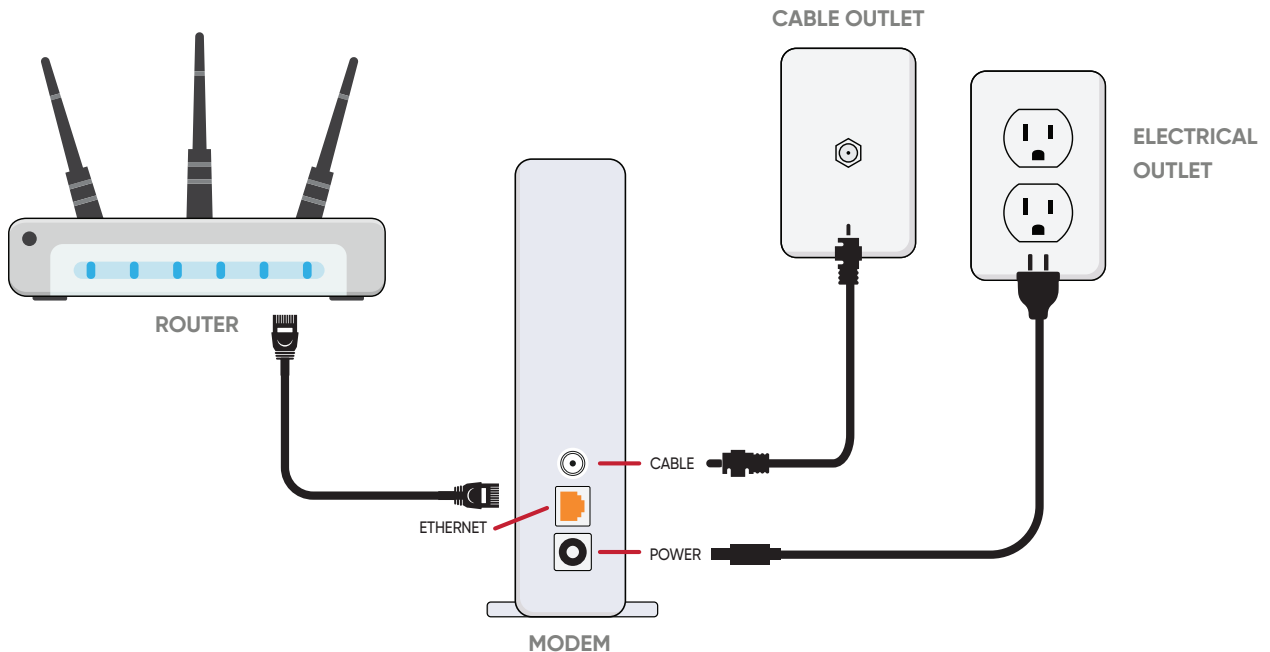

Tighten with included disposable wrench.

2

Connect the power adapter from the POWER port to the electrical outlet.

3

Transfer the ETHERNET cable from your old modem to the new one. This wire connects the modem to your router.

ARMSTRONG®

Important Notice: Your new advanced modem is being provided to you as an Armstrong customer. Failure to return this Armstrong equipment upon termination of service may result in additional charges. As a reminder, your services are subject to Armstrong's terms and conditions, a current copy of which can be found at www.ArmstrongOneWire.com/policies.
